Fashions won't work in plain Minecraft, so we need a special version that's designed to modding. Go to minecraft website Forge and download a version of Forge that is compatible with your chosen mods. If you have a mod for version 1.15.2, then download Forge version 1.15.2. If you use Chrome, it could say that Forge is a virus. Feel free to ignore it, though. Just click on the Java file as soon as it is downloaded and install it. 2. Using different versions of Forge Whatever it is, say, your chosen mod for version 1.12, you will need to manually add it to Minecraft after downloading and installing. To do this, open the Minecraft launcher and click on Settings. Next, click on the new one, and there should be a drop down list, which after clicking shows not only all the previous different iterations of Minecraft, but also your versions of Forge that you downloaded. Click on the forge you want and save it, then the launcher will download the appropriate version. Then it's just a case of returning to the home screen with playback, and on the left there's another drop-down menu where you can choose the version of Forge you want to play. 3. Finding the Minecraft fashion folderLoad Minecraft as you normally would. Once you click on the home title screen, the one where you create a new world or play with options should be an option marked with a fashion mark. Click on it. Then find where the open fashion folder is written. You can access this through Windows Explorer, but our path is much, much easier. 4. Installation MinecraftClose Minecraft, leaving the fashion folder open. Now you want to on the Internet and download the fashion or fashion you are after. We'll take the safety of this in a second, but right now just capture what you need and what you consider safe. Download the mods for your selected versions of Minecraft and then upload them to the mod folder. That's it! You can now download your version of Minecraft Forge, click on the fashions and check if they are active. Wasn't it nice and easy? OK, this is not a step as much as it is a general warning. Be very, very careful who you get your Minecraft fashions from. While there are a few reliable sites out there, all it takes is one bad egg to load a mod with some virus attached. The best way to check if something is safe is to read comments or check videos on YouTube uploaded from someone who isn't a fashion creator. It's also worth checking out how well known the creator is. Do they have many followers who will obey them? Will the virus run their Minecraft career? Always think before you click download.
